

ZERO BEAT

February 2020

Next Meeting, Thursday, 12 March 2020 1900 hours

Program: The “Hex Beam” antenna by Neal, KM4NWH

KARC - BMRC Feb. 2020 Meeting minutes

The February meeting was held at the Eastman Toy Reid center. The meeting was called to order by Rick WB4RLJ followed by the pledge to the flag and a prayer.

The Secretary's report was read by Rick. A motion was made to accept, seconded and passed.

The Treasurers report was read. A motion was made to accept, seconded and was passed.

The repeater report was as follows: The 2 meter repeater still experiences occasional noise/desense issues, but because it is infrequent and not seemingly related to weather it is believed to be interference from an outside source. A site visit is planned before the March meeting and will look for any issues at the site. The 442.500 Gray repeater (PL 118.8) has been moved to a new location at the county fairgrounds. This is on the linked system including our 443.325 repeater.

Web site - consensus as to it looking good. Carl Hacker will be updating minutes of past meetings/Zero beat info to be posted as necessary historical record.

Sunday night Club Net - good participation every week.

Old Business - New business --- Field day - Dave WB4DES still working with ETSU in regards to our proposed Mobile Communications Unit. Field day rent for Warriors Path shelter has been paid but the checking account is running low and the club liability insurance premium is coming due. It was suggested that the club cancel the reservation and get a refund. Discussion followed and suggested that donations could be made to offset that cost and keep the location. A motion to table was made and seconded and passed to defer to next month.

A motion was made to adjourn, seconded and passed.

The business meeting was followed by a Q and A with Dave Thomas, ARRL Section Manager for Tennessee.

Reports and Essays

Nets and repeaters listed in *Zero Beat*

Several nets and repeaters are listed in the *Zero Beat*. There are two projects for members of the club this month and indeed at any time. The first project will be to check into a net and if appropriate get a signal report. Then report to me the date you checked in, your location when checking in, and the signal report you received and the power you were using. Use the following e-mail address: carl.hacker@outlook.com.

The second project will be to monitor the repeaters used by the nets when it is convenient and, if you can join in a QSO, get a signal report. Then report the same observations to me when convenient. I will compile these observations and report the outcome in future additions of *Zero Beat*.

Thank you for your willingness to begin what I intend will be a larger and more methodically designed study of coverage footprints of several popular (i.e. chatty) repeaters in our area. Where my interest is motivated by the Skywarn program, other amateur radio activities could find value with this information.

Articles and Reports for *Zero Beat* ??

Please submit these to wc5wm@arrl.net

George DeVault is preparing a article to be published in the March edition of *Zero Beat*. Regular readers of the journal are familiar with his work and will appreciate reading more from him. Another member of the club is attending a program on using amateur radio for public service events (not ARES, Skywarn, or bicycle races) and I am nudging him to file a report or article soon.

THE ZERO BEAT NEWSLETTER

Is published monthly by the Kingsport Amateur Radio Club and Bay's Mountain Radio Club. For more information on ***Zero Beat***, please contact: Carl Hacker at WC5WM@arrl.com.
